Employee Appreciation Day - March 6

"I want to express my sincere gratitude for your continued efforts and the passion you bring to your roles every day. Your hard work and dedication are the force behind our success, helping us maintain our position as a leading provider of sustainable packaging solutions. By embracing our entrepreneurial spirit and working together, we continue to create an exciting environment where innovation thrives. Thank you for the culture you have built and for everything you do to drive our vision forward as we grow together."

-Brian McPheely,
Global CEO, Pratt & Visy Industries

Pratt U Regional Supervisor Training

In January, Pratt U held its first full-day Regional Supervisor training of the year in Cedar Hill, TX. Afterward, our Lathrop, CA supervisors extended their stay to apply what they learned in training by working on the floor with the Cedar Hill team. This hands-on collaboration focused on sharing best practices and ensuring we continue to deliver top-quality products to our customers.

Here We Grow Again!

Warner Robins Grand Opening

We officially opened our new 100% recycled corrugated box plant in Warner Robins, GA with a dedication ceremony featuring Global Chairman, Anthony Pratt and U.S. Secretary of Agriculture Brooke L. Rollins. Former Secretary Sonny Perdue and several key partners also attended the event to tour the site. This facility strengthens our operations and serves as a key part of our ongoing commitment to sustainable company growth.

New Rock Hill Corrugating Plant

We are excited to announce the expansion of our operations with a new corrugating plant in Rock Hill, SC. This new facility supports our continued commitment to invest in thoughtful sustainable growth. A special welcome to the team at Rock Hill!

Retirement Celebration

After 25 years with Pratt, our Travel Manager Sylvia Keels is retiring. Having expertly managed travel for the entire organization, Sylvia will be deeply missed, and we wish her the very best in her next chapter.

Maintenance Marvel

Felipe Chavez, a Maintenance Apprentice at the Allentown, PA corrugator, recently resolved equipment overheating issues by successfully resizing a hydraulic tank heat exchanger. Chavez is currently studying maintenance trades at a local college and follows in the footsteps of his father, who has served as a converting supervisor at the plant for over 15 years.

Bloomaker Booth - TPIE trade show in Fort Lauderdale

Pratt designers in Richmond, VA designed this collaborative booth with Bloomaker, a leading online floral store and design company. We have been partners with Bloomaker since 2017.

Perfect Attendance

The Southwest Converting Division recently celebrated employees who achieved perfect attendance in 2025. Each honoree received a YETI lunch bag in recognition of their continued dedication to Pratt Industries.

Clean Energy Team Celebrates 15 Years!

The Clean Energy team recently marked a 15-year milestone with a celebratory evening at the Ritz-Carlton in Atlanta. The event featured executive presentations, dinner, and dancing, with a special recognition for the original team members who have been with the plant since it opened.

Based in Conyers, GA, the Clean Energy plant provides a vital service by converting landfilled materials into the renewable electricity and steam that helps power our local manufacturing processes.

Happy Anniversary!

Spotlight on Safety

Out to Alarm Valpo

Pratt Valparaiso Mill – The Valparaiso, IN team has donated 100 carbon monoxide (CO) alarms to the Valparaiso Fire Department (VFD) to support fire safety efforts and protect residents throughout the community. The donated alarms will be distributed through the Valparaiso Fire Department’s Out to Alarm Valpo program. Carbon monoxide is an odorless, colorless gas that can be deadly without warning. It is produced by many common household items, including gas- and oil-burning furnaces, portable generators, and charcoal grills. Early symptoms of carbon monoxide poisoning include headache, dizziness, weakness, nausea, vomiting, chest pain and confusion — often described as flu-like.

Be sure to do your monthly and annual checks on at home CO detectors and be aware of other best practices:
